

Indonesian retail network security equipment SFP

Overview

Indonesia's Directorate General of Resources and Equipment for Post and Information Technology (SDPPI) has updated the requirements for SFP (Small Form Factor Pluggable) port products, including routers, Ethernet switches, gateways and firewalls. Our Infrastructure Recognition Platform provides specialized network equipment audit services designed specifically for retail organizations operating in Indonesia. With deep understanding of retail compliance requirements and operational needs, we deliver comprehensive asset visibility and audit. The TP-Link Omada SDN Solution empowers store owners to create a modern and compelling in-store experience for every customer. Provide secure wired and wireless networks to managerial staff of the mall and store owners and staff, and reliable wired networks for 24-hour surveillance in the mall.
