

# Installation of High Beam Link Module

## Installation of High Beam Link Module

---

### OEX CANbus High Beam Signal Detect Module

---

Designed to suit Toyota vehicles, the kit is an ADR compliant solution to switching driving lights where the traditional 'high beam' signal wiring is not available.

### How To Trigger Auxiliary Lights With Highbeams, Lowbeams, or

---

Want to turn on auxiliary lights when you turn on your headlights or fog lights? Here's how to do it. This will allow you to tie in aftermarket lights, be i

## **CANHBVX2 Hi-Beam CAN-Bus Interface**

---

s high beam controls (see page 4). The data is decoded from the vehicles CAN Bus and used to switch by successive high beam flashes. The plug-and-play nature of this product provides easy installation,

## **CANM8 Cannect Highbeam Output Interface**

---

The CANM8 CANNECT HIGHBEAM interface is a single output CAN Bus interface which provides a quick solution for detecting high beam activity on vehicles that

## **90mm Bi-LED High and Low Beam Headlight Module**

---

90mm Bi-LED High and Low Beam Headlight Module The 90mm Bi-LED headlights incorporate both the high and low beam into one projector module. One light

## **CAN Bus module for high beam**

---

The installation instructions can be accessed directly via a QR code located on the box. After scanning the QR code, you can easily search for your vehicle and get

## **CAN Bus High Beam Signal Interface**

---

HIGHBEAM is a CANBUS module that detects the high beam signal from the car's CAN network. In modern vehicles, the installation of additional high beam headlights is often difficult because the

## **Behaviour of Beam-Column Connection of Modular Steel Buildings**

---

Alternatively, panels (i.e., two-dimensional modules) can be manufactured off-site and then assembled using bolted connections on-site to avoid limitations of transportation. The current study aims to

## **High Beam Detect C CAN CAN Bus interface**

---

C CAN can be configured for "High Beam Detect" on most vehicles for driving light control. Combined with an on-switch input C CAN High Beam Detect uses a

## **CANM8 CANNECT High Beam Output Interface**

---

The interface features a mini wiring connector, which unplugs to allow easy installation. There are 2 connections to the vehicle CAN Bus wiring (CAN HI &

## CANHBBM2 Hi-Beam CAN-Bus Interface

---

Connect the female connector to the back of the speedometer and connect the male connector to the main power connection. Turn the ignition on and test the functionality of the Hi-Beam interface with

## Fleece GM All Lights On Module (03-07 Select Models)

---

Simply install the GM All Lights On Module to allow your high-beams, low-beams and fog lamps to simultaneously illuminate the road ahead. Once installed the GM All

## Plug and Play headlight module

---

Next you will need to simply disconnect your existing headlight plug (s) and install our harness between between your bikes harness and your headlight.

## **CAN Bus High Beam Wiring Kit - TrailBait**

---
