

Installation price of suspended cable trays

Overview

TL;DR: Basic wireway systems cost \$8-15 per linear foot, while heavy-duty cable tray installations range from \$12-25 per foot including materials and basic installation. They are strong, durable, and widely available, making them ideal for general-purpose electrical installations in residential, commercial, and industrial settings. The cable trays, rather than piping, may save 40 to 60 percent of the entire budget. During my time working on construction sites, I have observed the amount of time that goes to waste in an attempt to insert a heavy piece of wire through a pipe with a bend in it. Joe quickly realized the difference between spending 15 EUR/meter on rigid conduit versus 9 EUR/meter on cable trays would mean thousands of euros saved on the project – but only if installation complexity didn't add hidden costs. The main cost driver is the material used in manufacturing: □□ Galvanized steel is the most common.
