

# Integrated Micro-modular Data Center Construction

## Overview

---

The category spans 30 kW micro-modules tucked inside an enterprise floorplate, containerized 500 kW edge units, prefabricated rooms in the 1–4 MW range, and multi-megawatt power and cooling blocks that drop into a hyperscale campus. Micro and modular data centers offer businesses and organizations an agile, scalable, and cost-effective solution to meet growing IT demands. Modular solutions are ideal for enterprise, colocation, edge and cloud data centers, where project replicability and expandability are.
