

Intelligent Technology Support for Cabinet Power Distribution System

Overview

These units enable remote management, multi-point metering, and environmental monitoring. Overview: PLS-DP series of intelligent precision power distribution Cabinet series products include: power, UPS input, output, counter, three varieties of Cabinet. Server Technology is equipped to handle these new demands by offering intelligent rack PDUs with renowned technology for their engineering, reliability, security, and flexibility. The leading AI compute-heavy companies trust us to power their high-density IT infrastructure. ABB's Control Room offering includes a comprehensive range of solutions designed to optimize the operator workspace for critical 24/7 processes across various industries.

Intelligent Technology Support for Cabinet Power Distribution System
