

Is it safe to send a fiber optic cable to your home

Overview

Unlike wireless technologies, fiber optic cables do not create electromagnetic fields. Recognizing the potential safety hazard inherent in the installation and maintenance of optical fibers is crucial to mitigating risks of personal or property damage. Fiber optic cables, with their delicate nature and light-carrying capabilities, require stringent safety protocols. Running fiber internally involves extending this high-speed link from the service entry point to a centralized location, such as a dedicated media closet or network rack. This DIY effort is undertaken to maximize performance, improve aesthetics, or relocate the Optical Network Terminal (ONT) to a.
