

# Is the FC pigtail round or square

## Overview

---

The FC was the first optical fiber connector to use a ceramic ferrule, but unlike the plastic-bodied SC and LC, it utilizes a round screw-type fitment made from nickel-plated or stainless steel. The FC type fiber optic pigtail, short for Ferrule Connector, was developed in Japan. The FC type pigtail has a simple structure and is easy to operate, making it user-friendly even for. Get the wrong connector type, the wrong polish, or skip proper fusion splicing technique—and you're looking at elevated signal loss, increased back reflection, and a.
