

Kenya Cloud AI Server

Overview

Nairobi, Kenya - March 12, 2026 - Kenyan technology firms Atlancis Technologies and EverseTech have launched a sovereign artificial-intelligence cloud platform in Kenya, aiming to provide enterprises and government agencies with locally hosted AI computing. Kenya unveils Servernah Cloud, the continent's first sovereign-hosted AI platform designed for localized GPU workloads. Kenya has officially become the first country in East Africa to offer rentable, high-performance GPU infrastructure for artificial intelligence development, following the launch of NVIDIA-powered AI servers by Cassava Technologies at its Nairobi data center.
