

Lebanon Distribution Network Automation Fiber Ethernet Switch 400G

Overview

A compact 1U 400G switch built for AI clusters, storage fabrics, and high-speed aggregation, featuring four 400G QSFP56-DD ports, dual 10 Gigabit Ethernet, and RouterOS v7. Learn how the demands of specialized workloads like big data and AI are driving the transition to 400G and beyond to 800G, revolutionizing data center and network engineering. Handle network congestion with lossless networks that can power AI and video environments—critical for the modern business.
