

# Long-distance fiber optic cable relocation

## Overview

---

Fibre optic cable relocation involves moving existing fibre optic installations to a new location. This process demands careful planning to maintain service continuity and optimal performance. Corning's Long-Reach Technology offers cost-effective, reliable, and scalable long distance connectivity that can enable the deployment of complex technologies across the extended reach of campuses. For most enterprise or data center applications using multimode fiber, the practical limit sits between 300 m and 550 m.
