

Low-voltage busbar installation standards

Overview

The IEC 61439 standard applies to busbar assemblies that will be installed in electrical applications with a voltage rating up to 1000 V (for AC) and 1500 V (for DC). This standard defines the design verification, test requirements, and thermal performance of the assemblies. Adhering to industry standards such as IEC 61439 (low-voltage switchgear and controlgear) and UL 891 (switchboards) enhances.
