## Overview

---

Learn the step-by-step network patch panel and keystone jack wiring methods, including essential tools, T568A/B wiring sequences, and tool-free installation tips. Use a small yellow tool or wire stripper to remove the outer jacket of the network cable. They are commonly used to organize in-wall Ethernet cable runs, with cables running from Ethernet wall jacks to patch panels housed in central server rooms. The panel itself is made from blank ports on one side, and a termination point or keystone jack on the other side. At Turn-Key Technologies, we design and implement high-performance network setup solutions.
