Fortinet FortiDeceptor 100G

Early Threat Detection, Minimal Network Impact Protection Against Evolving Threats Deception For OT and IoT Environments Feature Benefits FortiDeceptor works by deploying and running decoys from the FortiDeceptor console using available IP addresses. As decoys leverage unused IP addresses across the different network segments, they do not impact network availability and, to the attacker, they seem like an integral part on your network. These IP addresses do not correspond to See more on avfirewalls Garland Technology
