

No network cable after unplugging the router's fiber optic cable

Overview

Quick fix: unplug and replug your Ethernet cable, restart your router, and check for any physical damage or loose connections. When I check the LEDs on the ONT box all seem fine but the router has no Internet, the router and WiFi connection is fine its just there is no Internet connection coming from the ONT, as if something happens and it drops the connection. If you are getting Network cable unplugged error on Windows 11/10 in the Network Connections panel, here are some tips to fix the issue. It may appear due to various reasons, and some possible causes and solutions are mentioned here.
