

# **Pigtail is a tight-buffered optical fiber**

## Overview

---

A fiber pigtail is a single, short, usually tight-buffered fiber optic cable with a factory-installed connector on one end, and un-terminated fiber on the other end. The connector end is polished and tested under factory conditions, ensuring low insertion loss and high return loss. The connector end plugs into devices like transceivers or patch panels, while the bare end is typically fusion spliced to a fiber optic cable.
