

Portuguese optical fiber cable under the crotch

Overview

The Olisipo submarine cable system is an unrepeated 110km domestic submarine cable connecting Sines to Lisbon in Portugal. Due to its location - in the mid-Atlantic, halfway between North America and Europe - Horta had a key position in the international submarine telegraph network, with a total of 15 international cables landed on Faial's island. Alcatel Submarine Networks (ASN) is honored to announce it has been awarded by Infraestruturas de Portugal (IP) the implementation of the innovative Anel CAM project, a submarine fiber optic cable network designed to upgrade and extend digital connectivity across the country and beyond. Explore cable routes, landing stations, system status and infrastructure updates.

Portuguese optical fiber cable under the crotch
