

Precautions for Relocating Optical Fiber Cables

Overview

Recommendations for Fiber Optic Cable Storage Where reels are supplied with protective material fitted over the cable, the protection should remain in place until the cable has been installed. If the protection is removed prior to installation (for inspection purposes for example) then it must be. Executive Summary: Fiber optic cable failures cost enterprises an average of \$15,000 per hour in network downtime—yet most catastrophic losses stem from a handful of preventable installation errors. From MPO fiber deployments in hyperscale data centers to single-mode links in industrial.
