

# **Primary distribution box 1220V**

## Overview

---

It distributes power to 10 NEMA 5-20R receptacles from a single NEMA 5-20P input with unfiltered electrical pass-through. Designed for datacenters and other electrically demanding applications, the CPS1220RM has durable metal housing and a 15-foot AC power cord. ABB's medium voltage switchgear (1 kV to 52 kV according to the IEC standards) are designed to connect and protect an evolving grid. The CyberPower CPS1220RM, a 12-outlet (6 front, 6 rear) rackmount power distribution unit (PDU), provides 100 - 125 V 20A output. Our flexible distribution boxes enable reliable, decentralised signal transmission and power transmission up to protection class IP67 - wherever passive distribution boxes are required.
