EPI unveils "Modular Data Center Standard"

Developed under the leadership of EPI, this standard was collaboratively prepared by a global committee representing various industries

Sustainable Procurement Guidelines for Data Centres and Servers

Public procurement can be an important tool in reducing the environmental impact of data centres, known for their high energy consumption in the broader information technology sector. Governments

Key Considerations for your Modular Data Centre

Michael Kurzer, Alexa Chally, and Sean Dao provide an overview of critical contract provisions that buyers should scrutinize when negotiating a

Sustainable Procurement Guidelines for Data Centres and Servers

The location of a data centre during the planning and design phase is critical, as it can affect key factors such as electricity consumption, utilisation of waste heat, risk management, data sovereignty, and

The Complete Guide to Modular Data Center Solutions

For example, by using data center modules, you can quickly add customized capacity to a colocation built to tenant specifications, or you can move electrical equipment to an external module to free up

Next-Generation Prefabricated Modular Data Center White Paper

To better promote prefabricated modular data center technologies, we hereby prepare the Next-Generation Prefabricated Modular Data Center Solution White Paper, which describes the

Prefabricated and integrated data center solutions

Overview With a complicated data center project that has short delivery timelines, prefabricated modular solutions and pre-engineered modular solutions may be

Data Center Knowledge Guide to Modular Data Centers

The data center infrastructure has evolved far beyond a centralized solution. Now, with cloud computing, more data demands, and distributed environments--there is a greater

Prefabricated Data Center

Sustain critical operations that simply can't go down with best-in-class uninterruptible power supplies (UPS) and power distribution units (PDU) that keep data center infrastructure up and running.

Modular Data Center Market Size & Growth Drivers

Modular Data Center Market Analysis by Mordor Intelligence The Modular Data Center

Market size was valued at USD 41.35 billion in 2025 and is

Modular Data Center Market Size & Trends Analysis, 2032

The modular data center market size will generate an estimated revenue of USD 30.9 billion in 2024 and witness a growth rate of 17.5% during 2025-2032.

EcoStruxure(TM) Modular Data Center

Transforming data center design and construction, modular data centers conquer space challenges and support quick scaling in industrial environments.

Supply, Installation and Management of Data Centre Equipment and

A compliant route to market for the provision of any or all elements of the supply, installation, management, maintenance, disposal and recycling of data centre equipment and data centre
