

# **Quick Method for Cable Management in Mesh Trays**

## Overview

---

Use wire mesh or dedicated fibre raceway above racks for structured cabling, and ladder trays for power. There's a reason wire mesh basket trays are a top pick in cable management systems: flexibility. Depending on the type and version of mesh cable tray, as well as the corrosion protection used, the mesh cable tray systems can be mbient temperatures of - 20 °C to + 120 °C. Properly managing cables in these trays ensures the smooth functioning of electrical systems, minimizes downtime, improves maintenance efficiency, and guarantees. It is made of welded steel wires forming an open grid structure that provides strength.
