

Requirements for Exposed Wiring in Secondary Distribution Boxes

Overview

Ensure safe placement: install in dry, accessible areas with good ventilation and at appropriate height (typically ~1. The conductors and equipment required or permitted by this subpart shall be acceptable only if approved, as defined in § 1910. This document represents the minimum requirements and specifications for the installation of the electrical underground distribution systems fed from padmounted transformation, serving Secondary Service Accounts, to be transferred to Oncor Electric Delivery Company ownership. Wiring requirements of distribution box Upper incoming line, lower outgoing line, main circuit on the left, control circuit on the right, horizontal and vertical. Both the Occupational Safety and Health Administration (OSHA) and the National Fire Protection Association (NFPA) require the insulation and protection of wiring energized at 50 volts or higher if the wiring is equal to or below eight feet off the ground.
