## ST7565P-V21b\_090914

---

ST7565P is a single-chip dot-matrix LCD driver that can be connected directly to a microprocessor bus. 8-bit parallel or serial display data sent from the microprocessor is stored in the internal Display Data

## ST7565P\_V2

---

ST7565P uses bus latch and internal data bus for interface data transfer. When writing data from MPU to the DDRAM, data is automatically transferred from the bus latch to the DDRAM as shown in Fig 5.
