

Server Rack Fire Protection System

Overview

Server rack fire suppression systems are specifically designed to detect and extinguish fires within server racks while protecting your valuable equipment. These systems can be found in data centers, server rooms, or environments housing critical IT infrastructure and computer rooms. Minimax OneU Server Rack Fire Suppression System Utilizing the environmentally friendly and sustainable clean agent Novec 1230 Fire Fluid by 3M, OneU is the only system that offers a state of the art solution in a single unit of space. We have developed TITANUS RACK•SENS ® to quickly localize a potential start of the fire in a closed server or control cabinet and thus detect it as early as possible.
