

Setting up multiple routers for telecom fiber optic cables

Overview

A common solution is to connect two routers on the same fibre optic line. In this article, Axarfusion will guide you through the steps to achieve this configuration and ensure that both routers work in harmony to give you a seamless browsing experience. Do you need to add more computers or devices to your network but have no available ports?

Adding a second router is a great way to expand your network capacity, as well as the reach of your wireless signal in weak or "blackout" areas. Then you can install a very good small and very fast switch at the "entrance" of the fiber connection. Abstract: This article provides a step-by-step guide on how to connect two routers to an incoming fiber optic supply, with the intention of having telephone and broadband services, while also utilizing additional features from the replacement router such as the Fritzbox 7590AX. However the real problem is how to create a balance, so assume room A is torrenting and taking up 90% of your internet bandwidth, then.
