

Single-hole cable tray support

Overview

per foot (based on a tray support, such as hanging clamps or a hanging bar, every 8 feet). Hanging bars have a slotted strut channel that you suspend from 1/2"-13 threaded rod; the. When developing our cable support OBO can offer reliable solutions for systems, three attributes are at the routing and fastening cables securely core of what we do: efficiency, resil- for each of these installation challeng-ience and safety. maintain spacing or to keep cables in place when the tray is ect the minimum bend ra-dius for cables as they exit the bottom of the cable tray. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray cont d for instrumentation and control applications that require. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore. They are available in perforated (RG) or non-perforated (R) versions, in heavy-duty versions (RS/RGS), for use under sprinkler. For ease of installation and accessibility, lay cable and hose in trays instead of pulling it through conduit or raceway.

Single-hole cable tray support

Cable Tray / Ladder Tray INSTALLATION PowerTray

General Installation Guidelines: For more information refer to the latest NEMA standards and local building codes. Trough tray field support and frequency depends on the weight and construction

Cable trays

Need help selecting the right cable ladder or -tray for your project? We offer a wide range of cable tray systems to support tubing, electrical cables and instrumentation.

Cable Trays , PohlCon - Partner from start to future.

Cable trays are an integrated, highly flexible cable support system when used in combination with the matching support structures, covers and system-specific accessories.

Cable Tray Technical Guide A practical guide to product selection and
