

Sliding 24 Fiber Optic Distribution Frame

Overview

24 Ports for Efficient Distribution: Supports 24 ports for organized fiber optic cable management, making it ideal for managing large-scale networks. It is made of a 1U 19" cold-roll steel box, with a plastic splice Tray inside, suitable for pigtail, ribbon and bunch cable distribution. And it has metal sliding fittings with self-locking functions to prevent the drawer from falling when moved. These panels include an internal mounting plate to install the Adaptors giving a reduction in the bend radius of the exiting patch cords also giving a more aesthetically pleasing installation. UnitekFiber's fiber optic distribution boxes provide organization, an access point for cable termination, and physical security all while sustaining the proper bend radius.
