

Sockets cannot be installed in distribution boxes

Overview

In a regular installation, sockets are supplied directly from the distribution box and are grouped into a single circuit. We test all of our CEE plugs and sockets according to the following standards before shipping them: The international standard IEC 60309 applies to plugs, receptacles, connectors and appliance couplers that are mainly used in industrial sectors (rated voltage up to 1. To enable individual control it is necessary to connect each socket to an individual power line. Choose the right box based on environment (indoor/outdoor), load capacity, and durability. Therefore, equipped and/or socket 'combination boxes' and 'fuse distribution boxes' that can be equipped are offered with flexible, robust, ergonomic, safe and aesthetical design options with modular structures that can adapt to rapidly changing and ever increasing requirements depending on the.

Sockets cannot be installed in distribution boxes
