

Southeast Asian Galvanized Cable Tray Raw Materials

Overview

The four primary materials—galvanized steel, stainless steel, aluminum, and FRP (Fiber Reinforced Plastic/GRP)—each serve distinct market segments with different cost structures, performance characteristics, and certification requirements. Cable trays play a crucial role in electrical systems, ensuring efficient and safe cable management. With a grounded metal barrier on the line to separate power wiring and data/communication cabling, a single, giant cable receptacle installation is capable of routing an oversized quantity of wiring. Roy Engineering Works founded in 1994 is a company which specializes in industrial products and machinery.
