

# **Southern European Communication Distribution Box Configuration**

## Overview

---

For projects up to 800A, both the CPS25 and BSM Box System are ideal solutions. Our flexible distribution boxes enable reliable, decentralised signal transmission and power transmission up to protection class IP67 – wherever passive distribution boxes are required. Primary Bonding Busbar (PBB) must be provided and located in the Telecommunications Entrance Room or Space. Telecommunications Bonding Conductor (TBC) shall be run from the service equipment power ground to the PBB.
