Spot Optical Electro-optical Hybrid Cable Single Mode

Powered by EIT Opto-Routing

Overview

This specialized cable integrates four premium 9/125 single-mode optical fibers with five robust 10mm² power conductors in a consolidated design, eliminating the need for separate cable runs. Thorlabs' hybrid fiber optic patch cables feature FC/PC and FC/APC connectors or FC/PC and SMA connectors. Devices deployed at the network edge—a 5G radio, a security camera, or an industrial sensor—require high-speed data connectivity and power. 1 explains the type II optical/electrical hybrid cable (OEHC) in which a copper pair is used for power delivery (not for telecommunications) and an optical fibre can support data transmission up to and beyond 1 Gbit/s. Whether in the prototyping phase or preparing for full-scale production, we provide flexible solutions to meet your needs.
