

Standard Size of Grounding Bolt for Distribution Box

Overview

Grounding screws are typically 10-32 and are often painted green for identification purposes. The green colour serves as a clear indicator to electricians and homeowners that the screw is a ground screw. Whether you're a seasoned pro or just starting out, this comprehensive guide will give you practical insights into proper grounding techniques, with a special focus on how selecting quality materials from a reliable building material supplier impacts your entire system's safety and longevity.
