Overview Variants Components and characteristics History Network elements Upstream bandwidth allocation Enabling technologies Fiber to the premises

For TDM-PON, a passive optical splitter is used in the optical distribution network. In the upstream direction, each ONU (optical network units) or ONT (optical network terminal) burst transmits for an assigned time-slot (multiplexed in the time domain). In this way, the OLT is receiving signals from only one ONU or ONT at any point in time. In the downstream direction, the OLT (usually) continuously transmits (or may burst transmit). ONUs or ONTs see their own data through the address labels embe

### Tanzania Wireless Frequency Bands and Carriers

---

Mobile networks and carriers in Tanzania use 2 GSM bands, 1 UMTS band, and 1 LTE band. Find out if your unlocked phone or mobile device will work in Tanzania

## **ONU PON Solution Manufacturer & Supplier**
