

Temporary power distribution box door not closed

Overview

Be sure the clasp is not closed on insulation and that the conductive wires are installed in the proper opening on the DIN terminals and breaker. Opening the small power distribution unit (SPDU) door to remove power is a common safety measure. This can apply to everything from events, to construction sites, emergencies and even as a replacement for batteries. Explore Hubbell Wiring Device-Kellems' spider boxes, built to provide reliable and versatile temporary power solutions in demanding environments like construction sites and outdoor events.

Temporary power distribution box door not closed
