

# **The router s fiber optic cable is exposed**

## Overview

---

You can use a visual fault locator (VFL), which is a device that emits a red laser light through the fiber, to trace the cable and spot any breaks, cracks, or bends. A fiber connector left exposed to rain, sun, and temperature swings is a ticking time bomb for your internet connection. Is it safe to look into a fiber optic cable while your Router is off?

So i have been without internet for more than a week now coz of a cyclonic event in our city. Even if BT are not your provider, the existing optical cable was provided at first fix by builder/ developer, if it's now faulty, either by them damaging it while installing it ( but taking a while to become service affected ) or something you have done,like driving a wall fixing through the. This guide explores the most common causes of fiber-optic cable damage, explains the technical impact of each risk, and provides actionable strategies to protect your fiber infrastructure.
