

# **UAE RoHS 400G Optical Module LPO**

## Overview

---

The module converts 4 channels of 100Gb/s (PAM4) electrical input data to 4 channels of parallel optical signals, each capable of 100Gb/s operation for an aggregate data rate of. Eoptolink QSFP112 400G LPO transceivers are compliant to the latest releases of the QSFP112 MSA. Our vertical integration for optical engines enables leading performance and per consumption. The racks of compute engines (GPU, CPU and storage) and the accompanying network infrastructure required for these applications consume significant electrical power from the grid. In a power-constrained AI cluster or data center, every Watt of power that is used by the network is a Watt of power. The 400G-FR4-LPO specification by the LPO (Linear Pluggable Optics) MSA defines a four-wavelength 100 Gb/s/lane, 53. 125 GBd, PAM4 optical interface using standard single-mode fiber with reach up to at least 500 m, and host-module electrical interfaces for hosts with DSP based SerDes and RS(544,514).
