

US Standard Distribution Box Cable Connector

Overview

Distributor box, application: Standard, connection method: M12 PUSH-PULL female connector / M12 socket, number of slots: 8, number of positions: 5, coding: A, slot assignment: Double, status display: yes, PNP; master cable connection: plug-in push-in spring. Distributor boxes bundle several cables into one master cable that is connected to the controller. Thanks to the status indicator, you have an overview of a large number of signals. Established in 1944, Douglas Electrical Components® is a leading manufacturer of interconnect solutions, with a wide range of tailored hermetic connectors and feedthroughs designed to meet the exacting demands of high technology industries worldwide. Organizing these cables is an essential design element to ensure smooth operation, efficiency, and serviceability.
