

Ukrainian OSFP optical module 40G

Overview

The series of product adopts LC or MTP/MPO connector and operates over Single Mode or Multimode optical fiber. FS 40G QSFP+ optical transceiver module solutions offer a full range of QSFP+ modules from 150m to 80km reach, and used for high-density switching, routing and data center applications. Eoptolink QSFP+ (Quad Small Form-factor Pluggable Plus) is a new Multi-Source Agreement (MSA) for high speed application, such as 40GBASE, which provide four channels of data in one pluggable interface. Each channel is capable of transferring data at 10Gbps and supports a total of 40Gbps. As data centers transition from 400G to 800G interconnects, bandwidth demand, power efficiency, and thermal constraints have forced the industry to look beyond traditional form factors. The modules most commonly used in 40G solutions include 40GBASE-LR4 QSFP+, 40GBASE-SR4 QSFP+, and 40G LR4 PSM.
