

# **Vertical and Horizontal Cable Tray Accessories**

## Overview

---

These fittings come in two main types: Horizontal Elbows are used for turns on the same flat plane, typically available at 45 deg or 90 deg. They offer an alternative to open wiring or electrical conduit systems and are necessary for cable management in commercial and industrial construction, as well as ventilation to heat producing cable such as power communication and other with the same or different width of the cable run. For ease of installation and accessibility, lay cable and hose in trays instead of pulling it through conduit or raceway. Explore our full collection of Metallic Ladder 3D Drawings, including horizontal fittings, vertical fittings and metallic tray.
