

Waterproofing Principle of Outdoor Distribution Boxes

Overview

Waterproof distribution box manufacturers tell you that the way to waterproof an outdoor distribution box is to first choose a distribution box made of waterproof material, seal the cable entry points, apply silicone sealant, install a weatherproof cover, use. Key design points include high-quality materials like ABS plastic, aluminum, and stainless steel that resist corrosion and UV. Usually, rubber sealing rings or sealants are used for sealing to effectively prevent the intrusion of rainwater, sand and dust. A Waterproof Distribution Box might not sound like the most exciting thing, but honestly, it's pretty crucial when it comes to modern electrical setups.
