

# **What are the benefits of connecting a router to fiber optic cable**

## Overview

---

A fiber router is designed to work specifically with fiber optic internet connections, providing faster and more reliable speeds compared to a normal router that typically works with traditional broadband connections. Fiber optic internet is a data connection carried by a cable filled with thin glass or plastic fibers. A fiber wireless router is a purpose-built router that integrates with a fiber optic modem to deliver a fiber Wi-Fi network from your Internet service provider.
