

What company is EOC optical module

Overview

has been serving the North American Photonics Industry with quality products for over 28 years. Through our partners we supply a variety of state-of-the-art, cutting-edge optics and systems. Manufactures signal recovery and lock-in amplifiers, laser diode and fiber-optic modules, thermopile, pyro-electric, PbS/PbSe and UV detectors, Mid IR LEDs and photo receivers, IR sources; E-O modulators, drivers and more. For questions, technical information or quotations, please email us or call 1-855-362-6300. Electro Optical Components (EOC) provides Advanced Systems and Components including Detectors, Sources, and Signal Recovery Amplifiers from the UV to the far IR. Our focus is exclusively in partnering with manufacturers that have the ability to assist in the development of new technologies from phase one.

What company is EOC optical module

Electro Optical Components Inc. Information

Established in 1997 Electro Optical Components Inc. has been servicing the photonics industry with quality solutions in the UV and mid Infrared components.

Electro Optical Components Inc (EOC) , Military Aerospace

Electro Optical Components (EOC) provides technologically advanced systems and components for lasers, optoelectronics, and gas detection systems from the UV to InfraRed, including signal

Electro Optical Components, Inc.

ElectroOpticalComponents(EOC)providesadvancedsystemsandcomponentsfor laser and optoelectronic systems from the UV to the far IR including Signal Recovery Amplifiers &

Electro Optical Components

View Electro Optical Components () location in California, United States, revenue, industry and description. Find related and similar companies as well as employees by title and much

Electro Optical Components Inc.

Electro Optical Components (EOC) provides Advanced Systems and Components including Detectors, Sources, and Signal Recovery Amplifiers from the UV to the far IR.

Electro Optical Components Inc. Information

Electro Optical Components Inc. is a Defense and Space Manufacturing, Manufacturing General, and Manufacturing company located in Santa Rosa, California with \$53 million in revenue and 4

Laser Diodes / Laser Diode Modules / LEDs

EOC provides high quality specialty laser products including laser diode modules, collimators, fiber-optic laser diode modules and FIBERPOINT(TM) fault locators. With the flexibility to provide a custom

Electro Optical Components

Electro Optical Components is a photonics solutions company that provides photoreceivers, amplifiers, generators, and gas sensor components.

4EOC master Module+ONU+OR All In One EOC Master

With EPON/GPON, EOC and HFC technology, the All-In-One product meets the CATV broadcasting, VOD and Internet Service requirement of cable operators for FTTB/FTTC. It build with EPON/GPON

Electro Optical Components

This is the supplier profile of Electro Optical Components, Inc., with address and other contact information, and with 27 registered photonics product categories.

Optics & Coatings

EOC offers a wide range of electro optic and passive optical components including: Attenuators, Beamsplitters Pockels cells, Electro optic Q-switches Electro-optic phase and amplitude modulators

Victor Yen

Victor Yen - EOC Founder Vic Yen Victor taught Engineering at Tri-State College in Indiana where he met his future wife, Carol. He then worked as a process engineer at Ford Motor Company in

Optical Components

Optical Components Polarizers / Beamsplitters / Attenuators / Isolators Pockels Cells / Electro-optic Q-Switches High Voltage Drivers / Modulators EOC offers a wide range of electro optic and passive

Electro Optical Components Company Profile

Electro Optical Components has 1 employees at their 1 location. See insights on Electro Optical Components including office locations, competitors, revenue, financials, executives, subsidiaries and

Electro-optic modulator

Electro-optic modulator An electro-optic phase modulator for free-space beams An optical intensity modulator for optical telecommunications An electro-optic

On board optical module with micro controller unit:

LIGHTPASS® is a series of multi-channel ultra-compact and thin optical module products designed for onboard optical applications. LIGHTPASS®-EOS 100G is

10 companies in the optical transceiver industry chain 2024

The rapid development of AIGC has promoted the demand for 800G optical modules, and the entire industrial chain involving optical components,

EOC Suppliers / Partners

EOC Suppliers / Partners ELECTRO OPTICAL COMPONENTS, Inc. is the North American distributor for: Art Photonics GmbH CAS Microstar Edinburgh Sensors FEMTO GenUV greenTEG Helioworks i

Electro Optical Components, Inc.

Exclusive North American distributor of technologically advanced components for a wide variety of laser and optoelectronic systems spanning the UV to the far infrared. EOC is a specialty technical

EOS Company Profile

EOS (Electro Optical Systems) is a provider of additive manufacturing, laser-sintering,

and industrial 3D printing solutions. Its products include case-hardening steels, cobalt chrome, copper, thermoplastic

Home

At EOC, we combine flexible research with customer-centric innovation to deliver solutions tailored to your needs. Our agile approach ensures rapid adaptation to

ELECTRO OPTICAL COMPONENTS Profile on

EOC is a specialty technical distributor representing high quality sensor and optical component suppliers. It was founded in 1997 to develop a sales organization for

Electro Optical Components, Inc.

Electro Optical Components, Inc. Exclusive North American distributor of technologically advanced components for a wide variety of laser and optoelectronic systems spanning the UV to the far infrared.

Electro Optical Components Inc (EOC)

Electro Optical Components offers a high temperature gas measurement module that can operate up to 190°C. The module is based on the NDIR (non-dispersive infrared) principle.
