

What router speed is needed for a 100M fiber optic connection

Overview

For fiber optic internet speeds of 100 Mbps or higher, a router supporting at least 1 Gbps is required. Look for routers with AX or AC designations (Wi-Fi 5 or 6) that support faster speeds than older N standards (Wi-Fi 4). The NETGEAR Nighthawk WiFi 7 Router BE9300 Tri-Band blew me away with its blazing speeds up to 9. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. With the many options available on the market, picking the best router for fiber internet can be tricky.
