

# **What to do if the router s fiber optic cable is not connected**

## Overview

---

Visually inspect the end of the cable to ensure that it is not damaged or malformed. If the problem persists, consider contacting your service provider for assistance and possibly a cable replacement. However, setting up a fiber optic connection to your router can seem daunting if you're unfamiliar with the process. When issues like signal loss, slow speeds, or intermittent connectivity arise, systematic troubleshooting is key.
