

What type of equipment is an explosion-proof distribution box

Overview

An explosion-proof distribution box is a rugged enclosure for hazardous areas, safely delivering power while preventing sparks or heat from igniting flammable surroundings. Rather than stopping an explosion from occurring, the equipment safely manages it within a reinforced structure. Pepperl+Fuchs provides a specialized portfolio of Ex d (flameproof) and Ex tb (dust protection by enclosure) certified terminal boxes and junction boxes engineered for reliable use in explosion-hazardous areas. These sturdy solutions are certified according to global standards such as ATEX, IECEx.
