

Why does the router only display the power fiber optic cable G

Overview

This could be due to a cut cable, issues at the exchange, or a problem with the ONT itself. The tables in this article provide detailed information about the possible appearances of the LED lights on each device, the possible causes of each state, and what you should do. The LEDs on your modem, optical network terminal (ONT), router, or modem/router combo (gateway) are most likely blinking because they're communicating what the device is doing, or there's an error. Most ONT devices have several lights, often labelled with icons or abbreviations.

Why does the router only display the power fiber optic cable G

How To Connect Fiber Optic Cable To Router?

Connecting a fiber optic cable to a router involves a few key steps and specialized equipment. Here's a simple guide to help you through the process: 1.
