

# **Width of Singapore photovoltaic cable trays**

## Overview

---

Wanco Perforated Steel Cable Trays are constructed using the highest grade of Electro-Galvanised Sheet Steel for Epoxy Powder coating and high grade hot rolled steel for Hot Dipped Galvanised coating. A universal mounting system, built with cable trays of varying widths and connecting elements, allowing for versatile installation. OBO cable support systems combine the best possible protection with rapid mounting. In practice, cable tray dimensions are a system of interrelated measurements —width, depth, length, and material thickness—that directly affect cable fill compliance, heat dissipation, structural loading, and long-term expandability.
