

Wiring Methods for French Lighting Distribution Boxes

Overview

In French houses, the wiring diagram for lights and outlets is based on a system known as "Conducteur de Terre," or "Earth Conductor. " This system has been in use since the early 20th century and is still widely used today. Where appropriate, the guide provides an insight into the differences between the UK and French systems and highlights the reasons behind these differences. Common misunderstandings are clarified and practices that are unacceptable in France but acceptable in the UK, and vice versa, are. Domestic wiring diagrams are highly technical documents that help electricians and anyone else doing electrical work understand the intricacies of electrical systems. Light fixtures come in all shapes and sizes and are responsible for producing light.
